The Five-Year WATER/Engineering & Management Index

Five-Year Reference Handbook Index Contents

This index is one of the most valuable reference sources available in the water/wastewater industry. It has been prepared to provide readers with a research capacity in key water and wastewater subject areas.

Citations are arranged alphabetically within the key subject areas. Author names are provided, followed by the month, year and page number of publication. Reference Handbook articles are designated with an "R" preceding the page number.

The articles listed in this index appeared from 1977 through 1981 in monthly issues of *Water & Sewage Works* magazine and the annual *Reference Handbook*.

We are unable to supply reprints of articles which appeared in an issue prior to January, 1980. If such material is desired, it can be obtained by writing Xerox University Microfilm, 300 N. Zeeb Rd, Ann Arbor, MI 48106.

Five-Year Index 1977-1981 Water

MANAGEMENT

ADMINISTRATION

An Evaluation Submerged in Variables. Partrick C. Mann . . . . . **Nov '79 32**

Audits Aid Even the Best-Managed Utilities. Frederick H. Elwell and Christopher P. N. Woodcock . . . . . **Sept '78 82**

AWWA is No Adversary of EPA in Advocating New Positions. Curtis H. Stanton . . . . . **May '79 75**

Chandler's Systems Staying on Top of Growing Needs. James D. Goff and Art F. Vondrick . . . . . **Jan '81 42**

City Can Conserve Despite Sufficient Water. L. Meyer, R. Clemens, D. Whitehill and C. Job . . . . . **May '79 54**

Coming to the Point. . .of Use. Walter J. Polens . . . . . **Aug '79 10**

Determining the Payback Period in Life Cycle Costing. William R. Baker . . . . . **Feb '78 41**

Economics and Water Conservation. Richard K. Schaefer Part 2 . . . . . **Aug '79 28**

Ensuring the Public's Drinking-Water Welfare . . . . . **Oct '78 30**

Equitable Rate Doesn't Compromise Conservation Interests. Fred P. Griffith, Jr. . . . . **Feb '79 59**

Health Data on Fluoride Gets In-Depth Probing. Marc A. Strassburg and Sander Greenland . . . . . **July '79 60**

Impact of Expanding Regulatory Climate on Water Utility Financing Programs. Richard A. Pavia . . . . . **Feb '81 57**

Impact of Municipal Water and Sewage Charges on Industry. Robert J. Schaffer and Barry L. Pickard . . . . **R '77 R107**

Integration Brings Better Use of Water Resources. P. F. Stott . . . **Mar '81 59**

Learn the Moves; Squelch the Danger. George Clifford White . . . **Dec '79 26**

Model Aids Managerial Effectiveness in Municipal Water Systems. Kenneth W. Hollman, Edward E. Milam, James H. Sellers, Ronald R. Bush and Joseph F. Hair, Jr. . . . . **R '78 R114**

Modern Management Techniques, A Case History of Production Improvement. Gary S. Thompson and Thomas G. McCoy Part II . . . . . **Mar '81 88**

Modern Management Techniques. Gary S. Thompson and Thomas G. McCoy Part IIB . . . . . **Apr '81 56**

Need for, and Importance of, Productivity Improvement. Gary S. Thompson and Thomas G. McCoy Part 1 . . . . . **Feb '81 52**

On the Marginal Cost of Water Supply. Steve H. Hanke . . . . . **Feb '81 60**

On Water Tariff Equalization Policies. Steve H. Hanke . . . . . **Aug '81 32**

Rate Structure "Recognizes" Good and Bad Conservation. WSSC Citizens Advisory Committee . . . . . **May '79 60**

Setting Realistic Water Rates. John W. Castle . . . . . **Jan '79 52**

Simple Rules Make Tool Use Safe . . . . . **Dec '80 46**

Small Water Systems—What Can Government Do for Them? Alan Levin and Hugh F. Hanson . . . . . **Mar '81 77**

St. Louis County Water Company: Tracing and Growth of a Changing Utility. T. L. Gloriod and R. S. Knight . **May '81 38**

The Effect of Common Law Water Rights on Conservation. Mary Reardon . . . . . **July '79 30**

The Impact of the Safe Drinking Water Act on Small Utilities. C. Robert Morris . . . . . **Apr '79 64**

The Real World of Small Water Treatment Plants. Herman P. Knacke . **Oct '79 58**

Two Cities Meet Conservation Challenge. L. Meyer, R. Clemens, D. Whitehill and C. Job . . . . . **Mar '79 60**

Water District Converts to Computerized Billing. William J. Brandow **Apr '77 93**

Water Rate Survey in Michigan. V. W. Langworthy . . . . . **Feb '81 40**

Water Resources in the Legislative Balance, 1982. Warren Viessman, Jr. and Claudia Copeland . . . . . **Dec '81 32**

Winter is No Time to be Left Out in the Cold. Thomas F. Dalton . . **Nov '79 50**
Zero-Base Budgeting: A Trend Toward Reform. Philip Rosenberg . **Dec '78 60**

PLANNING AND SCHEDULING

Chlorine Emergency Preparedness Drill. David R. Booth and Kelly Futch . . . . . **Jan '81 60**
Conservation Project Shows Substantial Reduction in Home Water Use. William E. Sharpe and Donald Smith **June '78 94**
Dilemma: Abundant Water, Severe Shortages. Gerald D. Seinwill . . **Feb '79 51**
Economics and Water Conservation. Richard K. Schaefer . . . **June '79 82**
Facts Fix Fund Finding. George D. Simpson . . . . . **Apr '80 56**
Facing a Major Disaster with Calm Assurance. Paul R. Singer and Charles F. Voyles . . . . . **June '80 58**
How Will Small Utilities Comply with the Safe Drinking Water Act? James C. Pfuntze . . . . . **Jan '77 50**
Rolling Plans are a Useful Tool. Steve H. Hanke . . . . . **R '81 R60**
Water and Energy: Linked Resources. R. Stephen Berry, Margaret Lounsbury and Sandra Hebenstreit . . . . . **Aug '81 42**
Water System Controlled by Loan Management Program. V. W. Rodemann . . . . . **Apr '81 44**

SUPPLY AND RESOURCE

GROUNDWATER

Agency Created to Fight Coastal Subsidence Menace. James E. DeBerry . . . . . **June '77 62**
Analyzing Nitrates in Well Water. Willis W. Whitlock, Jr. . . . . **Mar '77 63**
Artificial Basin Recharge. Harry I. Nightingale and William C. Bianchi . . **R '81 R85**
Authority of Coastal Subsidence District Challenged. James DeBerry . . . . . **Aug '77 55**
Chicago Plan Designed for Pollution and Flood Control . . . . . May '77 50
Choosing a Potable Water Supply: What You Need to Know. H. S. Hundal, R. B. Trattner and P. N. Cheremisinoff . . . . . **Mar '79 78**
Controlling Impoundments which may Pollute Groundwater. . . . Jan '78 62
Design Tool Aids Groundwater Management. Harry I. Nightingale . **June '80 56**
Formulating State Groundwater Policy in Pennsylvania. Carlyle W. Westlund . . . . . **Feb '78 67**
Faulty Waste Disposal Practices Endanger Groundwater Quality. Bangalore T. Lakshman . . . . . **June '79 94**
Groundwater—In the Eighties. Jay H. Lehr . . . . . **Mar '81 30**
Groundwater Organic/Inorganic Pollutant Health Standards. Bangalore T. Lakshman . . . . . **R '79 R174**
Groundwater Protection in the Christina Basin. Joachim Tourbier . . **Jan '78 68**
Groundwater Sources Located by Fracture Trace Technique. William F. Sharpe and Richard P. Parizd . . . **May '79 38**
How to Meet Well Project Goals. Fred H. Klaer, Jr.
Part 1 . . . . . **May '78 84**
Part 2 . . . . . **June '78 114**
Innovative Water System Solves Quality Problem. John A. Roller and Walter N. Moline . . . . . **Nov '78 70**
Leachate Testing Techniques Surveyed. William Lowenback, Fred Ellerbusch, John A. King and Paul N. Cheremisinoff . . . . . **Dec '77 36**
Meeting the Groundwater Contamination Problem. Jack W. Keeley . **Nov '77 88**
National Water Commission Views Groundwater Protection. Harvey O. Banks . . . . . **Oct '77 73**
New Wells Serve Relocated Town. Barry J. Ling . . . . . **Feb '77 44**
Overview of Federal Groundwater Protection Legislation Aids Environmentalists. R. Kent Ballentine . . . . . **Apr '78 68**
Policy Implications of Urban Land Practices for Groundwater Quality. Harold F. Wise . . . . . **Oct '77 84**
Preventing Groundwater Contamination from Agricultural Non-Point Sources. Keith S. Porter . . . . . **Mar '78 70**
Remote Sensing Detects Groundwater in England. A. G. P. Debney . **Apr '78 32**
Ridding Groundwater of Hydrogen Sulfide. Thomas G. Lochrane.

Underground Injection Program Set Under Safe Drinking Water Act. John W. Hernandez . . . . . **Oct '77 67**
The Role of Interstate Commissions in Groundwater Protection. Jerrald Hollowell . . . . . **Sept '77 102**
Water Well Analyzers Make Accurate Pump Tests. Udal P. Singh and J. Ignacio Garcia-Bengochea . . . . . **May '78 64**

SURFACE WATER

Algae as Sources of Trihalomethane Precursors. R. C. Hoehn, D. B. Panres, B. C. Thompson, C. W. Randall and P. T. B. Shaffer . . . . . **Sept '79 66**
Atlanta Plans Ahead to Assure Future Water Supply. . . . . Mar '78 34
Basin Management in the San Bernardino Valley. Larry W. Rowe . . . **May '81 79**
California Copes with Driest Year on Record. Melissa Blanton . . . **Nov '77 92**
Choosing a Potable Water Supply: What You Need to Know. H. S. Hundal, R. B. Trattner and P. N. Cheremisinoff . . . . . **Mar '79 78**
Conservancy Districts Develop Area-Wide Water Resources. R. T. Holzworth . . . . . **July '78 33**
Dam Building No Longer Means "Instant Progress." Sid Gautam . . **Aug '78 30**
Eldorado County Bolsters Dwindling Water Supply. Halmar Moses . **Apr '78 30**
Enumerating Bacteria in River Water and Sewage Effluent. Larry P. Elliott . . . . . **R '81 R122**
EPA Monitors River for Poisonous Substances. . . . . May '78 48
Federal Help Eases New Jersey Drought. V. W. Langworthy . . . . . **May '81 76**
Flow Metering Flumes Monitor Water in Coastal Forest Watershed. John A. Replogle, Hans Riekerk and Benee F. Swindel . . . . . **July '78 64**
Getting a Bird's Eye View of Your Resources. G. W. Fraza and M. E. Holland
Part 1 . . . . . **Feb '80 56**
Part 2 . . . . . **Mar '80 38**
Part 3 . . . . . **May '80 66**
Israel Strives for Efficient Use of Water Resources. Ruth Lahav . **June '77 64**
Perception Influences Water Conservation Success. . . . . Feb '80 34
Point-Source Loads: Not Always Cases in Point. Edward L. Thackston, Frank L. Parker, George J. Hyfantis and Eric Morgan . . . . . **Dec '78 53**
Potomac Estuary Tapped for Pilot Study. Perry Costas . . . . . **Nov '78 64**
Rapid City Combats the Effects of Urban Runoff on Surface Water. Steven M. Pirner and Leland L. Harms . . **Feb '78 48**
Remote Sensing Improves Conventional Sampling Procedures. J. S. Bhutani, J. S. Burton and P. N. Cheremisinoff . . . . . **R '78 R108**
Regional Program: More Potential Than Success. Bradley F. Smith and William N. Thompson . . . . . **May '77 86**
The Aftermath at Longview. Larry E. Copien . . . . . **May '81 68**
Sampling Methodologies for Assessing Rural Runoff. F. J. Humenik, F. Koehler, L. Bliven, J. W. Gilliam and M. R. Overcash . . . . . **July '79 31**
Special Packaging/Conveyor Solves PAC Handling Problem. Hubert L. Nielsen . . . . . **Sept '78 112**
Stream Surveillance and Monitoring in Urban Areas. William Whipple, Jr. and Alan W. McIntosh . . . . . **Apr '79 72**
Storm Runoff Microbiology Adds to Concerns. A. A. Qureshi and B. J. Dutka . . . . . **Mar '79 86**
Study Predicts Future Water Shortage for Northeast and Mid-Atlantic States. James A. Johnson . . . . **June '78 90**
Submersible Pumps Installed at Nearby Scenic Lake Provided Needed Water. Joseph F. Moynihan . . . . **Mar '81 53**
Supplying New York's Water Needs for Year 2000. James A. Johnson . . . . . **Aug '78 54**
System Protects Fish from Water Intake Structure. . . . . Mar '78 63
Treatment Restores Acid Water. David Barr . . . . . **Jan '80 29**
Unregulated Potomac River Causes Supply Problems in Washington, D.C. George K. Withers, Jr. . . **Sept '78 108**
Surface Water: Texas Gulf Coast Alternative to Subsidence. James E. DeBerry . . . . . **July '77 52**
Water Quality Program of the U.S. Geological Survey. R. J. Pickering . . . . . **Apr '77 88**

REUSE

Human Factor in Design and Operation of Water Reuse Facilities. Roy D. Miller and Walter P. Lambert . . . . . **Jan '81 58**
Ozone Purifies Wastewater for the Reuse Cycle. Harvey M. Rosen . . **R '79 R122**
Reclaiming and Reusing Wastewater. William H. Bruvold and James Cook . . . . . **Apr '81 65**
Water Reclamation Plants Need Complete Reliability. Takashi Asuno and Kurt L. Wasserman . . . . . **Sept '79 88**

TRANSMISSION AND STORAGE

Benefits of Pumps Realized by Proper

Installation. William W. French . . . . . Sept '78 64
Clearing Up Some Misconceptions About Basic Lining Technology. Oct '77 52
Federal Help Eases New Jersey Drought. V. W. Langworthy . . . . . May '81 76
Maximum Allowable Water Siphon Height. Adam Zanker . . . . . R '81 R105
San Diego Converts Pipeline to Meet Water Damands. John Boland Jan '79 58
Steel Epoxy-Lined Pipe Serves South American Water System. Mar '77 33
Water Main Serves Town During Drought. . . . . . June '77 78

TREATMENT

DESIGN

A Guide to Protective Coatings in Water/Wastewater Treatment Facilities. Morris A. Vivone and Thomas P. Delany . . . . . R '80 R92
Analytical Procedure Used in Clarifier Upgrading. Robert M. Crosby and Clyde E. Young . . . . . Mar '79 68
Cost of Computing Granular Carbon Adsorption Treatment. Robert C. Gumerman, Russel L. Culp and Robert M. Clark . . . . . R '80 R42
Design and Economic Considerations of GAC Systems. Carmen F. Guarino, Joseph V. Radziul, Patrick R. Cairo, Dennis D. Blair, Michael M. Pence, Bruce S. Aptowicz and Norman Weintraub . . . . . Sept '80 58
Designing Open Channel Acoustic Flowmeters for Accuracy. Francis C. Lowell, Jr.
Part 1 . . . . . July '77 70
Part 2 . . . . . Aug '77 84
Downgrading Costs on Upgrading Small Water Systems. . . . . . Dec '79 30
Ensuring Clarity and Accuracy in Torque. William H. Boyle . . . . . Mar '78 76
Fiberglass Structures: Economic, Trouble-Free Aeration Units. Alan Hartenstein . . . . . Aug '77 79
Fluoridation Progresses in England. K. C. G. Stroud . . . . . Mar '78 58
From Screening to Filtration: Treating the Water Supply. H. S. Hundal, R. B. Trattner and P. N. Cheremisinoff
Part 2 . . . . . June '79 88
Part 3 . . . . . Aug '79 48
Part 4 . . . . . Dec '79 25
Part 5 . . . . . Jan '80 54
Ion-Exchange Beds Defy Organic Fouling. Ronald J. Cichon, Richard B. Trattner and Paul N. Cheremisinoff . . . Sept '80 48
Non-Metal Parts End Valve Cylinder Corrosion. O. W. Summers . . May '79 56
Ozone's Many Applications Expands Its Image. C. W. Michael Robson . . . . . R '79 R130
Pinch Valves Resist Lime System Problems. Larry L. Schneider . . Feb '77 58
Potable Water Treatment: Technical and Economic Analysis. P. N. Cheremisinoff, J. Valent, D. Wright, R. Fortier and J. Magliaro . . . . . Jan '77 46
Producing Quality Water for Industrial Use. Donald J. Schaezler . Nov '78 41
Proper Butterfly Valve Application Avoids Costly Repairs. Gregory A. Kurkjian, Jr. . . . . June '78 84
Protecting a Piping Network from Itself. Mildred Hastbacka . . . . . Aug '81 35
Sedimentation Maximizes Clarity, Minimizes Turbidity in Potable Water Treatment. J. D. Walker . . . . . R '78 R136
Treating the Water Supply. H. S. Hundal, R. B. Trattner and P. N. Cheremisinoff . . . .

A NATURAL RESOURCE

The Pie Pans. This outcropping of high grade sodium bentonite near Wyo-Ben's Greybull, Wyoming plant is considered a geological phenomenon - a landmark which we have committed ourselves to preserving for its unique beauty and scientific importance.

Wyo-Ben, Inc. understands and respects the importance of our environment. This understanding spans our entire operation.

First, we study the effect of mining on the ecology and future use of an area. Reclamation plans are considered carefully in order to return the land to equal or better use after the mining phase is complete.

Then, samples undergo thorough laboratory analysis to determine the quality and eventual use of the bentonite. During processing, lab tests and quality control are exercised at every point in processing to assure you that the ENVIROGEL™ we supply for water seepage control on your reclamation project is the highest quality Wyoming Bentonite, precisely ground and sized to exacting specifications.

When your water management plans call for bentonite, remember ENVIROGEL. It's mined, processed and distributed by people who understand the environment we both work with.

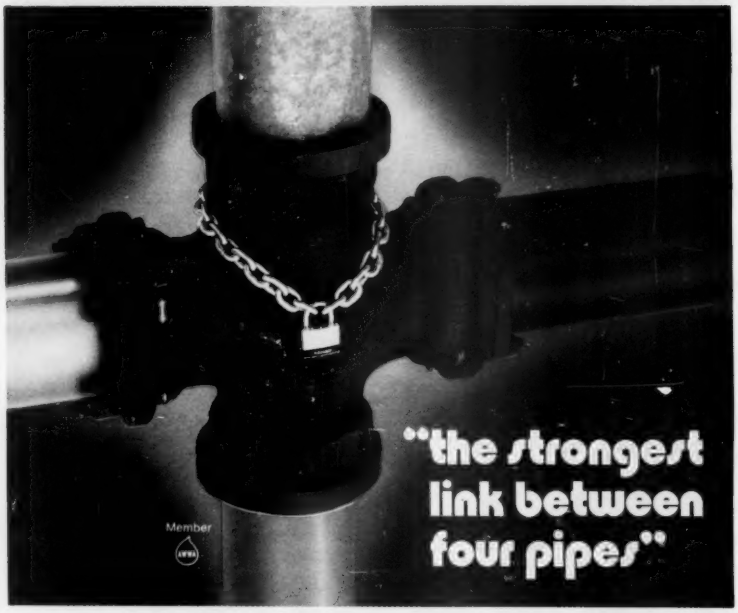
Continuous Monitoring of Ozonation.



Whether your system is cast iron, ductile, asbestos cement, iron pipe size plastic or C-900 PVC pipe, the strength of your system depends on the connecting joints. Trinity Valley products are manufactured under strict control standards to assure that our customers receive high quality cast iron fittings. These fittings have the strength and durability to meet the requirements of any water system. With Trinity Valley fittings, you can rest assured that you have the strongest connecting joints you can install.

As one of the world's largest independent manufacturers, our stock provides virtually any size or type of fitting required. Our staff is trained in working with various piping systems to help select the best fitting for your application.

Shipments can be mixed to include the correct fitting for every joint in the system. Trinity Valley goes to almost any extreme to satisfy our customers.

Meet Rodney Nolen, Sales Engineer, helping you select the best fitting for job requirements.

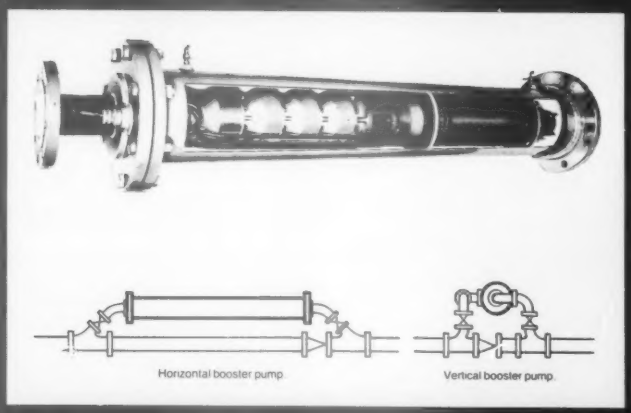
The Un-Expensive Pump Station



Hayward Tyler Booster Pumps

- solve pressure and flow problems
- do not need above-ground structures
- remain hidden to escape vandalism
- do not disfigure landscape
- can operate submerged in floods
- run silently in the horizontal or vertical position
- comes pre-assembled and tested
- capacities available from 20 g.p.m. to 7,500 g.p.m.
- pumping heads 10 - 1,500 ft.
- voltages available 230, 460, 575, or 2,300

Clean Screen...
Continuously - With Parkson's Aqua-Guard Bar Filter Screen.*

Continuous, self-cleaning screening action makes the AQUA GUARD Screen a unique innovation in screening equipment.

As the endless belt slowly travels upward, it collects solids of sizes ranging from 1.0 mm to 8 inches, and continuously carries them out of the flow. The unique mechanical interaction of the screen elements then positively ejects the debris. The result: no blinding, no jamming, and reduction of head loss across the screen. This unique operation, coupled with rugged, corrosion-resistant construction means maintenance-free operation.

The AQUA GUARD Screen requires no field assembly, and installs in a matter of hours. Its features also include modular construction for custom design, field interchangeability of mesh size, no submerged bearings, and low power consumption.

AQUA GUARD Screens are operating in over 100 installations including preliminary screening of sewage influent; pump protection; surface water screening for potable water treatment and industrial process water; power plant recirculating systems; food processing, tannery, textile and paper mill process and effluent screening.

* Recently acquired by Parkson from Dynaco, Inc. of Lauderhill, Florida

Disinfecting with ClO_2?

Put our experience and nationwide sales/service network on the job for you!

When you're ready to install a chlorine dioxide system, Wallace & Tiernan is ready for you. With over 60 years experience in supplying the needs of the water treatment industry, we know your problems ... and how to solve them!

Our systems have the capacity, control modes, and cost-effectiveness to handle your needs. Standard capacities up to 510 lb. per day, with higher capacities available. Control can be manual, start-stop, or automatic flow-proportional. W&T Systems generate chlorine dioxide on-site and apply it immediately for maximum efficiency and economy.

Our chlorine/chlorite/acid method of ClO_2 generation uses a dilute hydrochloric acid solution to lower the pH. The process produces a disinfectant with a minimum of unreacted chlorine. Thus there's minimum danger of forming trihalomethanes ... important in view of the maximum allowable THM levels recently prescribed by EPA.

So when you're thinking ClO_2, think Wallace & Tiernan. Your colleagues in the industry have been, for many of our products, since 1913.

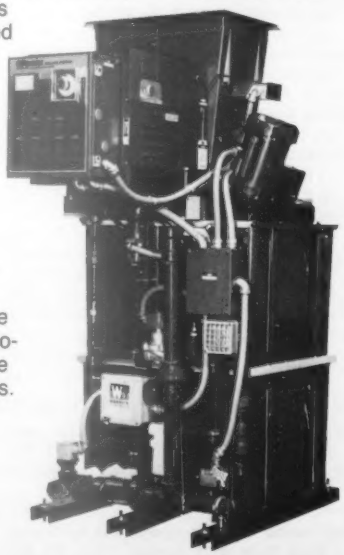
Imagine! A Polyelectrolyte System that goes on-line in hours

Here's a pre-packaged, automatic polyelectrolyte system that you simply move into place, connect water and electricity. That's all there is to installing Wallace & Tiernan's Series 35-300 Polyelectrolyte System; it's been pre-tested at the factory.

For dry or liquid polymers, this compact unit requires only 7 square feet of floor space. Continuous preparation of polymer batches is monitored from a control panel. Feeding, wetting, mixing, aging, and transfer of finished polyelectrolyte are controlled via electrically interlocked sensors and timers at each step. The system is designed to provide only properly aged polyelectrolyte in precise amounts with repeatable consistency.



A control timer gives positive aging . . . helps produce a highly reactive solution using only the necessary polymer. Precise metering of the dry powder helps eliminate polymer waste. By minimizing inadequate wetting, a high-energy W&T Jetspray Wetter also helps save this expensive chemical.

Series 35-300 Systems can prepare to 5,000 gpd of aged polyelectrolyte solution. They're backed by a nationwide network of sales and service branches.

Put a maintenance free roof on your tank. Use a Temcor Aluminum Dome.

- **Over 250 Major Installations.**
- **Cost competitive with steel or concrete.**
- **Aluminum Does not rust or spall.**
- **Ideal for new or existing tanks.**
- **Can be erected with tank in service.**

■ With Aluminum Domes, steel and concrete tanks cost less, stay in service longer and are column free. ■ Waste water processes are more efficient and odors are contained. ■ Temcor designs, fabricates and erects clear-span domes up to and over 300 feet in diameter. ■ Tell us your requirements, we'll meet them. Write or call for details including a list of installations near you.

ANTHRAFILT®

PLUS!

UNIFILT CORP. offers a *TOTAL FILTER MEDIA SYSTEM*

1. ANTHRAFILT®. . . the world's finest anthracite filter media available in standard sizes. Standard #1 through #7 are normally available from inventory. Special UNIFILT grades are available to satisfy specific needs.
2. FILTER SAND—Standard Gradations
3. FILTER GRAVEL—Standard Gradations

All filter media from one source. Efficient delivery direct from our own coal source by our own truck fleet. Self-unloading trailer delivery can be provided at a minimal additional charge to reduce handling costs. Unifilt is the exclusive world-wide source for ANTHRAFILT®—available in bulk, 1-ton sacks with bottom discharge spout for 15 second discharge or 52 lb. hi-impact poly bags. All media complies with the new AWWA B-100 specifications. Write for additional information.

AMARILLO GEAR DRIVES

A REAL POWERHORSE FOR A VARIETY OF USES

The industry's most dependable spiral bevel right angle gear drives — Proven reliable and efficient by more than 45 years of experience — Each drive thoroughly factory tested — 25 standard models from 20 to 1800 HP — A wide range of increasing and decreasing ratios — Easily adaptable to water supply systems — Waste water management systems — Fire and flood control systems — Factory Mutual Approved for use with vertical fire pumps — Fast air freight delivery if you ever need replacement parts — We also make drives for cooling tower fans — Write for our catalog No. 29.

AMARILLO GEAR COMPANY

BOWIE PUMPS

we get to the bottom of things

Bowie Pumps move everything from dog food to molasses at an even flow. And, the Bowie Pump continues to flow even under extreme temperature conditions. Bowie Pumps come in a complete series of sizes for amost every application — inboard and outboard ball bearing pumps are furnished in 2 and 3 inch sizes. Bushing type with 1¼, 1½, 2 and 3 inch sizes are available with bypass valves. Get to the bottom of things with a Bowie Pump. Order yours today.

Maintenance Tip for Sludge Bed Dewatering Operations. Karl Ellis . **Jan '81 68**
Measuring Petroleum Hydrocarbons in Digested Sewage Sludges. Dickson L. Liu . . . . . **Mar '78 40**
New Procedure Determines Aerobic Sludge Stability. R. B. Hartman, E. R. Bennett, K. D. Linstedt and D. G. Smith . . . . . **Apr '78 42**
Optimizing Gas Production, Methane Content and Buffer Capacity in Digester Operation. N. Brovko, K. Y. Chen, M. S. Weinberg and N. R. Barber . . . . . **July '77 54**
Planning, Executing and Profiting from Polymer Trials. J. P. Hauck **Aug '77 32**
Problems and Solutions for Sludge Treatment. James E. Smith, Jr. . **May '77 81**
Reducing Coliform and Salmonella Bacteria During Anaerobic Digestion. Michael B. Cooke, Edward L. Thackston and George W. Malaney . . . . . **Jan '78 50**
Remove Heavy Metals Two Ways. Gordon A. Lewandowski and Mahmoud F. Abd-El-Bary . . . . . **Jan '80 44**
Resurrecting the Dead Anaerobic Digester. Donald P. Snelling . . . **Aug '79 66**
Sanitary District Solves Sludge Removal Problem. . . . . . **Dec '77 54**
Sludge Management in the Rocky Mountain State. Mark J. Maxwell **Dec '81 28**
Sludge Treatment: Problems and Solutions. James E. Smith, Jr.
Part 1 . . . . . **Apr '77 60**
State of the Art of Municipal Sludge Management. Allan Jacobs, Don Brailey and Bryce Pickart
Part 1 . . . . . **Aug '79 60**
Stepping Stones Form Basis for Solids Management Program. William J. Katz, Wayne St. John, Richard D. Fox and David R. Horsefield . . . . . **Nov '79 63**
Survey of Anaerobic Digestion Supernatant Treatment Alternative. Nicholas A. Mignone . . . . . **Jan '77 42**
Virginians Optimize Sludge Handling. Matthew H. Thomas, Jr. . . . . **Dec '81 36**

DISPOSAL

An Overview of Sludge Disposal. Allen Serper . . . . . **R '80 R20**
Plunger Pumps Handle Sludge. . . . . . **R '80 R100**
Computers Analyze Land Treatment Systems in Phoenix. Ronald L. Ewing and Nick Ferrari . . . . . **May '78 76**
Evaluation of Winter Application of Liquid Sludge To Farmland. Thomas Bates, J. W. Ketcheson, R. A. Johnston and Y. K. Soon . . . . . **R '81 R155**
Human Health Risk? Using Sludge for Crops. George Braude, Bernard P. Sagik and Charles A. Sorber . . . **Dec '78 62**
Kansas Treatment Plant Uses Subsurface Injection of Sludge. Ray E. Strain . . . . . **Nov '77 42**
Land Application of Municipal Sludge. George Dakes and Paul N. Cheremisinoff . . . . . **R '77 R38**
Land-Applied Effluents Impact Water Resources. Harold W. Wolf, Bernard P. Sagik and Charles A. Sorber . . . **Mar '79 66**
Land Disposal of High Cadmium Sludge. Anthony J. Tarquin . . . . . **R '81 R143**
Land Treatment Uses Sludge at Madison, Wisconsin. James Cunningham, James L. Nemke and Don Marske . . **Mar '80 28**
Making Waste a Farming Resource. James L. Nemke . . . . . **R '81 R146**
Public Acceptance of Sludge Land Application is Vital. Joachim Tourbier . . . . . **Sept '78 126**
Small City Switches to Land Application of Sludge. Ervin E. Nesheim **Apr '79 76**
Thermally Conditioned Sludge has Agricultural Uses. . . . . . **May '78 73**
Too Much Sludge—Spread It. Lowell Wines . . . . . **Sept '78 84**
Turning Sludge into Soil Conditioner Solved. Frank Senske and Tom Lauletta . . . . . **July '78 24**

INSTRUMENTATION

Computer System Offers Low-Cost, Real-Time Monitoring. E. D. Lukasik, B. K. Snyder and W. B. Denniston, Jr. . . . . **Nov '78 46**
Economics Justifies Computer-Control Feed. David L. Ching . . . **Aug '80 36**
Instrumentation and Controls: How Much is Enough? Osmund Brynie **Apr '77 102**
LA TI Adding to its Computer Capability. Ed Weiderman . . . . . **June '79 92**
Manchester, Connecticut's Information Collection and Management System for Wastewater Treatment. . **Mar '81 72**
Water/Wastewater Process Control Instrumentation—An Overview. Russell H. Babcock
Part 1 . . . . . **Mar '80 30**
Water/Wastewater Process Control Instrumentation—Physical Parameters and their Measurement. Russell H. Babcock . . . . . **May '80 60**
Water and Waste Process Control Instrumentation—Analytical Parameters and their Measurement. Russell H. Babcock . . . . . **Jan '81 30**

OPERATION

Ultrasonic Monitor/Sensor Controls Sludge Flow. . . . . . **June '78 109**
Interface Control Systems Useful in Treatment Plants. C. A. Cianfrani . . . . . **Feb '77 54**

LABORATORY

Atomic Absorption in Water and Wastewater Analysis. Richard D. Ediger . . . . . **R '77 R112**
Biggest Lab Gets Tested Each Day. . . . . . **Nov '79 55**
Comparative Study Outlines Methods of Analysis of Total Metal in Sludge. Joseph J. Delfino and Robert E. Enderson . . . . . **R '78 R32**
DO Probe Winkles Winkler. Glenn Smeaton . . . . . **Aug '79 52**
Exasperated by Costs? Cut Aspiration! Robert E. Mooshegian and Harlan H. Bengston . . . . . **Oct '79 33**
Improved Methods of Oil-In-Water Analysis. Peter P. Cook and Richard C. Bourke . . . . . **R '78 R71**
Lab Equipment Price Tables. Wesley O. Pipes . . . . . **R '79 R50**
Lab Modernization Creates New Problems for Plant Operators. Douglas W. Clark . . . . . **Oct '77 82**
Laboratory Workhorse: The Analytical Balance. Douglas W. Clark **Jan '79 64**
Measurements: The Key to Laboratory Analysis. Douglas W. Clark **Jan '81 63**
Moisture Determination Balance Speeds Up Total and Volatile Solids Analysis. Anthony J. LaSpine . . . . **Feb '78 61**
Oklahoma Lab Certification Program Ascertains Data Reliability. Michael P. Madden . . . . . **Feb '78 70**
Purge and Trap Scores High with Low THM Concentrations. M. M. Varma, M. R. Siddique and K. T. Doty . . **Nov '79 39**
Quality Assurance in Water and Wastewater Analysis Laboratories. Joseph J. Delfino . . . . . **July '77 79**
Quality Assurance Program Restores Confidence in Data. Robert B. Pojasek . . . . . **R '77 R110**
SDI Offers Precision at Low Turbidities. Lionel B. Luttinger . . . . . **Mar '79 74**
Staining Mixed-Liquor Biota. Michael Gerardi . . . . . **June '80 64**
Test Effect of Chemicals on Biological Processes. William Sun and Donald W. Register . . . . . **R '81 R34**
Water Reclamation Plants Need Complete Reliability. Takashi Asuno and Kurt L. Wasserman . . . . . **Sept '79 88**
Water/Wastewater Analysis by Atomic Absorption Spectroscopy. David C. Manning . . . . . **R '79 R76**

TRAINING

Consultant's Role Expands in Training Plant Personnel. John P. Micketts . . . . . **Mar '79 76**
Detroit Pursues Training with a Purpose. William B. Thompson . . . **Dec '78 65**
Fixing Faulty O&M Training Programs. Thomas M. Weston, Sr. and Stephen R. Kellogg . . . . . **Nov '81 38**
Michigan Fits Training to Operator's Needs. W. J. Redman and John Bloemker . . . . . **Dec '80 43**
O&M Training Needs Demand Money, Patience and Time. Joseph Hanlon . . . . . **June '79 61**
Operators Speak Out About Training. Rawle Alloway and Owen Boe . . . . . **Nov '81 30**
Operator Training Program in Pennsylvania. William A. Duvel and Anthony J. Zigment . . . . . **Jan '77 57**
Some Basic Safety Rules and Safe Practices. . . . . . **R '81 R56**
The Classroom Route to a Good Start-Up. Allen C. Van de Boe and Landon Niedringhause . . . . . **Nov '81 40**
The Joint Training Coordinating Committee Sets National Standards. William R. Hill . . . . . **Dec '80 33**
